

Expressions

Equations

Common  
Features

Inequalities

Simplify

$$v^2 = 144$$

Combine like terms

$$3m - 4 > m + 6$$

Variables

$$3t + 8 = 2(t - 5)$$

Inverse Operations

=

Constants

$$21 < 2b - 7 < 15$$

$<, >, \leq, \geq$

Gather like terms to one side

$+, -, \times, \div$

$$3c^2d$$

Evaluate/Solve

$$5n - 9$$

Order of Operations

Flip inequality symbol when multiplying or dividing by a negative number

$$7 + 6 = 4a - 15$$
