

## Selection

If statements are used to make selections; to specify if we should do something based upon certain conditions.

## Example uses

```
if (int < 3) {  
    System.out.println("Number is less than 3");  
} else {  
    System.out.println("Number is NOT less than 3");  
}
```

```
if (int < 3) {  
    System.out.println("Number is less than 3");  
} else if (int > 9) {  
    System.out.println("Number is greater than 9");  
} else {  
    System.out.println("Number is between 3 and 9");  
}
```
